SUMMARY

Principal Architect with extensive experience in enterprise architecture, application modernization, data engineering, and AI initiatives. Proven ability to lead global teams in designing and delivering solutions for insurance, life sciences, healthcare, and banking clients. Expertise includes mainframe modernization, Databricks lakehouse platforms, microservices on AWS, and advanced agentic workflows. Adept at aligning architectural strategies with enterprise priorities and mentoring engineering teams to drive innovation and achieve business goals.

SKILLS

- **Leadership & Strategy:** Engineering leadership, technology roadmaps, delivery leadership, architectural governance.
- **Application Modernisation**: Java/J2EE, Spring Boot, API-first architecture, REST, microservices, event-driven architecture.
- **Cloud & Delivery**: AWS, Azure, AKS, CI/CD.
- **AI Engineering:** LangGraph, LangChain, Azure OpenAI, MCP, RAG, vector stores.
- **Data Platforms**: Databricks, PySpark, Delta Lake, Unity Catalog, ETL, medallion architecture.

WORK EXPERIENCE

Principal Architect (Associate Director), Cognizant

10/2022 – Present

- Spearhead architectural strategy and delivery for application modernization, data engineering, lakehouse, and AI initiatives across global insurance, life sciences, healthcare, and banking clients.
- Directed architecture and delivery for migration of insurance data pipelines from mainframe technologies to AWS/PySpark, cutting effort and cost by **40% through AI-assisted code migration and deployment.**
- Design a pilot agentic workflow using LangGraph and GPT-4o for compliance audit analysis, reducing manual activities by **70-80% with human-in-the-loop review.**
- Direct a 30+ member team of managers, architects, and engineers, aligning delivery priorities with enterprise roadmap decisions.
- Design Databricks lakehouse platforms with medallion architecture, PySpark, Delta Lake, and Unity Catalog for clinical and commercial data.
- Lead modernization of a P&C insurance platform into API-first Java microservices on AWS, defining service boundaries and resilience standards.
- Define enterprise integration architectures connecting IQVIA, Salesforce CRM, and SAP to foster cross-functional analytics and reduce data silos.
- Establish architectural standards, mentor engineering teams, and align solution roadmaps with senior stakeholders.

Senior Architect, IBM
06/2019 – 09/2022

- Directed end-to-end architecture for a banking credit-card operational data store utilizing Databricks and PySpark.
- Optimized ETL pipelines, reducing data latency by 90% to support near-real-time operational visibility.
- Spearheaded the transformation of legacy monolithic applications into decoupled Java microservices to enhance resilience and scalability.

Architect, Optum Global Solutions (UnitedHealth Group)
12/2015 – 05/2019

- Designed healthcare integration platforms using API-led connectivity for policy and claims administration.
- Improved operational efficiency by 40% through the design and implementation of an integration platform.
- Established enterprise architecture governance to align solution decisions with business priorities and long-term platform direction.
- Defined API-first architecture standards for REST services, improving consistency across connected healthcare applications.

Technical Architect, HCL Technologies
08/2008 – 10/2015

- Provided technical leadership for enterprise Java applications, translating business needs into scalable solution direction.
- Guided application architecture and module design across enterprise initiatives, improving consistency from design through implementation.
- Aligned engineering implementation with integration requirements, coordinating third-party API orchestration across delivery teams.

Module Lead / Senior Engineer / Consultant, First Advantage / Wipro / TCS
05/2003 – 07/2008

- Built Java-based application components and supported module-level engineering across enterprise software projects.
- Provided client consulting on technical requirements, translating business needs into practical development guidance.

CERTIFICATES

- Databricks Certified Data Engineer Professional, Databricks
- Databricks Certified Generative AI Engineer, Databricks
- Databricks Certified Machine Learning Engineer, Databricks
- Databricks Certified Data Engineer Associate, Databricks
- AWS Certified Solutions Architect, AWS
- TOGAF Certified Enterprise Architect, TOGAF

EDUCATION

- MBA in Data Science — Jain University
- B.Tech in Electronics and Communications Engineering — MG University
