SUMMARY

Principal Architect with extensive experience in enterprise architecture, application modernization, data engineering, and AI initiatives. Proven ability to lead global teams in designing and delivering solutions for insurance, life sciences, healthcare, and banking clients. Expertise includes mainframe modernization, Databricks lakehouse platforms, microservices on AWS, and advanced agentic workflows. Adept at aligning architectural strategies with enterprise priorities and mentoring engineering teams to drive innovation and achieve business goals.

SKILLS

- **Leadership & Strategy:** Engineering leadership, technology roadmaps, delivery leadership, architectural governance.
- **Application Modernisation**: Java/J2EE, Spring Boot, API-first architecture, REST, microservices, event-driven architecture.
- **Cloud & Delivery**: AWS, Azure, AKS, CI/CD.
- **AI Engineering:** LangGraph, LangChain, Azure OpenAI, MCP, RAG, vector stores.
- **Data Platforms**: Databricks, PySpark, Delta Lake, Unity Catalog, ETL, medallion architecture.

WORK EXPERIENCE

Principal Architect (Associate Director), Cognizant

10/2022 – Present

- Spearhead architectural strategy and delivery for application modernization, data engineering, lakehouse, and AI initiatives across global insurance, life sciences, healthcare, and banking clients.
- Direct team of 30+ including managers, architects, and software engineers, aligning architectural decisions and technology roadmaps with enterprise priorities.
- Directed architecture and delivery for migration of insurance data pipelines from mainframe technologies to AWS/PySpark, applying AI-assisted workflows to code migration and deployment, reducing effort and cost by 40%.
- Designed Databricks lakehouse platforms utilizing medallion architecture, PySpark, Delta Lake, and Unity Catalog to integrate clinical, commercial, and market data.
- Led modernization of a P&C insurance platform into API-first Java microservices on AWS, defining service boundaries, migration sequencing, and resilience standards across applications / teams.
- Define enterprise integration architectures connecting IQVIA, Salesforce CRM, and SAP to foster cross-functional analytics and reduce data silos.
- Designed a pilot agentic workflow using LangGraph and GPT-4o to support Agentic AI for regulatory compliance audit and analysis, incorporating human in loop; and achieved 70-80% reduction in manual activities
- Establish architectural standards, mentor engineering teams, and align solution roadmaps with senior stakeholders.

Senior Architect, IBM
06/2019 – 09/2022

- Directed end-to-end architecture for a banking credit-card operational data store utilizing Databricks and PySpark.
- Optimized ETL pipelines, reducing data latency by 90% to support near-real-time operational visibility.
- Spearheaded the transformation of legacy monolithic applications into decoupled Java microservices to enhance resilience and scalability.

Architect, Optum Global Solutions (UnitedHealth Group)
12/2015 – 05/2019

- Designed healthcare integration platforms employing API-led connectivity for policy and claims administration.
- Enhanced operational efficiency by 40% through the design and implementation of an integration platform.

Technical Architect, HCL Technologies
08/2008 – 10/2015

- Provided technical leadership for enterprise Java applications, integration solutions, and third-party API orchestration.
- Guided application architecture, module design, and engineering implementation across enterprise initiatives.

Module Lead / Senior Engineer / Consultant, First Advantage / Wipro / TCS
05/2003 – 07/2008

- Executed progressive roles in enterprise software development, module design, Java engineering, data processing, and client consulting.

CERTIFICATES

- Databricks Certified Data Engineer Professional, Databricks
- Databricks Certified Generative AI Engineer, Databricks
- Databricks Certified Machine Learning Engineer, Databricks
- Databricks Certified Data Engineer Associate, Databricks
- AWS Certified Solutions Architect, AWS
- TOGAF Certified Enterprise Architect, TOGAF

EDUCATION

- MBA in Data Science — Jain University
- B.Tech in Electronics and Communications Engineering — MG University
